Digital security

- [Cybersecurity Assessment Tool \(CAT\)](#): CAT is designed to help you identify strengths and weaknesses in your cybersecurity approach, as well as provide resources for improvement.
- [Security in a box by Frontline Defenders](#): This toolkit has simple and straightforward guides on risk assessment, password management, secure communication and device security
- [Social Media Security & Privacy Checklists \(Open Source\)](#), a resource developed by the New York Times with steps for enabling recommended security measures for social media platforms
- [Surveillance Self-Defense](#) contains tool guides and digital security recommendations for various contexts
- [Spanish and Maayat'aan] [Cuidando nuestro cuerpo-territorio digital](#): A digital poster containing digital safety recommendations for women and dissidents defending socio-environmental justice
- [Protest Digital Security Checklist for Activists \(2026\)](#): Digital security recommendations to protect yourself when participating in a protest
- [Signal Security Checklist for Activists \(2026\)](#): How to securely set up Signal
- [Digital Safety Guide for LGBTQ+ Activists in Africa](#): This is a great guide put together by Access Now on how LGBTQ+ Activists based in Africa can protect themselves online.

Responsible data

- [The Engine Room's Becoming RAD tipsheet](#): This tipsheet provides practical guidance on Retention, Archiving, and Disposal (RAD) of data.
- [Responsible Data Handbook](#) to understand responsible data and how to protect data across the project/data lifecycle

- [The Responsible Data Resource List](#) presents a curated collection of resources on policies, data management and data security

Privacy

- [Glitch Armour](#): A collection of tools and recommendations to reclaim privacy through small, deliberate choices
- [Online Privacy for Nonprofits: A Guide to Better Practices | Electronic Frontier Foundation](#)
- [No Trace Project](#): A collection of tools to help anarchists and other rebels understand the capabilities of their enemies, undermine surveillance efforts, and ultimately act without getting caught

Incident Response

- [DIGITAL SECURITY HELPLINE - Access Now](#): Guides and materials to help communities, organizations, and individuals improve their digital security.
- [SocialTIC Forensics](#): Resources on how to conduct digital forensics for civil society
- [The Digital First Aid Kit](#): A guide by CiviCERT that helps rapid responders, digital security trainers, and tech-savvy activists to better protect themselves and the communities they support against the most common types of digital emergencies

Policies

- [SOAP](#) generates simple cybersecurity policies for your organisation. It doesn't store or process any of your data. After receiving the initial draft, customize the policy to fit your context and infrastructure.

Learning platforms

- [Shira App](#) and [Phishing Quiz by Jigsaw](#): Platforms to test your knowledge and identify phishing
- [Digital Safetea](#): An interactive game to learn digital safety through the lens of three African women fictional characters
- [Infuse](#): A community developed framework to help digital protectors advance their technical expertise including website security fundamentals, detecting and analyzing malware
- [Cybersecurity Academy](#): Our platform that accompanies CAT has courses on devices security, password management among others.
- [Totem](#): Totem is an online platform that helps journalists and activists use digital security and privacy tools and tactics more effectively in their work
